

CMS WORKSHOP LECTURES

Volume 20

**SURFACE MODIFICATION
OF CLAYS AND
NANOCOMPOSITES**

THE CLAY MINERALS SOCIETY

Joseph W. Stucki, Series Editor and Editor in Chief
University of Illinois
Urbana, IL 61801-4798, USA

Gary Beall, Volume Editor

Texas State University-San Marcos, Department of Chemistry and Biochemistry,
601 University Drive, San Marcos, Texas 78666, USA

Contents

Chapter 1. Synthesis of quaternary ammonium ion-montmorillonite organoclays: Theory and practice	1
by CLOIS E. POWELL	
1. Introduction	1
2. Theory	2
3. Practice.....	7
4. Summary	9
References.....	10
Chapter 2. Surface modification of smectite clays via ion-dipole bonding	13
by GARY W. BEALL	
1. Introduction	13
2. Specific examples	15
2.1. Montmorillonite/n-alkyl pyrrolidone complexes	15
2.2. n-alkyl alcohols.....	17
2.3. Aldehydes	18
2.4. Pentaerythritol stearate organoclays.....	19
3. Polymer treatments	22
4. Conclusions	24
References.....	25
Chapter 3. Organo-functionalized kaolin-group minerals: Synthesis, structure, and properties	27
by JAKUB MATUSIK	
1. Introduction	27
2. Kaolinite nanotubes in the synthesis of polylactide-based nanocomposites	28
3. Methoxy-kaolinite and intercalation of ammonium salts	30
4. Interlayer quaternized kaolinites with anion-exchange properties	32
5. Interlayer grafted kaolinites for heavy-metal sorption	34
6. Conclusions	35
Acknowledgments	35
References.....	36
Chapter 4. Tailoring the surface properties of synthetic clays via intercalation, grafting, or <i>in situ</i> incorporation of organic moities	39
by JOCELYNE BRENDLÉ	
1. Introduction	39

2. Modification of commercially available synthetic clays by ion-exchange: preparation, characterization, and applications.....	41
2.1. Intercalation of inorganic species	41
2.2. Intercalation of organic species	46
3. Modification of commercially available synthetic clays by grafting: preparation, characterization, and applications.....	52
4. One-step synthesis of organic-inorganic hybrids with a talc-like structure.....	56
5. Conclusions	57
References.....	57

Chapter 5. Sulfonic acid-functionalized α -zirconium phosphate single-layer nanosheets for catalysis and fuel-cell applications61

by **YINGJIE ZHOU, HANG HU, RONGCAI HUANG, FUCHUAN DING, JINGJING LIU, ALEX D. BRITTAIN, MENG ZHANG, MIN XIAO, YUEZHONG MENG, and LUYI SUN**

1. Introduction	61
2. Experimental	63
2.1. Materials	63
2.2. Synthesis of ZrP micro-crystals and preparation of single-layer ZrP nanosheets	63
2.3. Functionalization of ZrP nanosheets	63
2.4. Characterization	64
2.5. Catalysis evaluation	64
2.6. Preparation of composite membranes	64
2.7. Membrane electrode assembly (MEA) fabrication and single-cell test	64
3. Results and discussion.....	65
4. Conclusions	68
Acknowledgments	68
References.....	68

Chapter 6. Three unusual techniques for the analysis of surface modification of clays and nanocomposites73

by **GIORA RYTWO, LINDA CHORSHEED, LIOR AVIDAN, and ROY LAVI**

1. Introduction	73
2. Description of the techniques	74
2.1. Determining colloidal particle charge using a streaming current detector.....	74
2.2. Dispersion-analyzer measurements	76
2.3. NMR relaxation rate for surface-area measurements	82
3. Summary	84
Acknowledgments	85
References.....	85

Chapter 7. Inorganic nanoarchitectures based on sepiolite.....87
by **PILAR ARANDA and EDUARDO RUIZ-HITZKY**

1. Introduction	87
2. Metal and metal-oxide nanoparticles supported on sepiolite	88
3. A colloidal route to producing sepiolite-based inorganic nanoarchitectures	92
4. Sepiolite-based nanoarchitectures based on the assembly of more complex NPs	95
5. Concluding remarks.....	97
Acknowledgments	98
References.....	98
